

Super Store Sales Dashboard

Power BI Report Documentation | SalesDashborad_pbi.pbix

Overview

This Power BI report (.pbix) presents a single-page interactive sales dashboard built on a **Sales Dataset** table with a dedicated **_Measures** table of DAX measures. The report lets a user filter store sales data by year, product category, sub-category, payment mode, and state, and view the resulting KPIs and category/state breakdowns update live.

This PDF was generated directly from the report's internal structure (layout JSON extracted from the .pbix file) so it can be previewed on GitHub, which cannot render .pbix files natively. Page 2 is a to-scale layout reference of the dashboard; because the underlying data model is a compressed Power BI data file that requires Power BI Desktop/Service to open, the numbers and bar proportions on that page are **illustrative placeholders**, not the live figures — open the .pbix in Power BI Desktop for the real values.

Data Model

Table	Role
Sales Dataset	Fact table — order-level sales records (Year, Category, Sub-Category, Payment Mode, State, and underlying sales/profit/quantity fields)
_Measures	DAX measures table — Total Sales, Total Profit, Total Quantity, Profit Margin %, Total Orders

Filters (Slicers)

Year · Category · Payment Mode · State · Sub-Category

KPI Cards

Total Sales	Total Profit	Total Quantity	Profit Margin %	Total Orders
-------------	--------------	----------------	-----------------	--------------

Charts

Visual	Type	Fields
Sales by Category	Clustered column chart	Category (axis) x Total Sales (value)
Profit by Category	Clustered column chart	Category (axis) x Total Profit (value)
Quantity by Category	Clustered column chart	Category (axis) x Total Quantity (value)
Sales by Sub-Category	Clustered bar chart	Sub-Category (axis) x Total Sales (value)
Sales by State	Clustered bar chart	State (axis) x Total Sales (value)
Profit Margin % by State	Clustered column chart	State (axis) x Profit Margin % (value)

See page 2 for a to-scale layout preview of the dashboard.
